Why Are DuneCraft Growing Kits the Gold Standard of the Industry?

All of our products utilize terrariums which create a closed, self-sufficient micro-climate that retains humidity and heat, both essential to successfully sprout seeds. No matter what size or retail, all of our high quality items utilize terrariums, and include premium sprouting mixture with all the micronutrients and minerals that seeds need to germinate and for plants to flourish.

Out of the millions of plants in existence, only several hundred are actually suitable to grow in an indoor environment from seed. We have comprehensively tested thousands of plants over the years to determine the best species to use. This firsthand knowledge guarantees excellent results. While some plants may sprout indoors, they must be quickly transplanted outdoors. At DuneCraft, we use only the freshest seed and test every batch that we receive to insure a consistent outcome.

DuneCraft has seed kits of all sizes and price points to accommodate any customer/grower. With over 100 kits currently and new additions released every year, most of our unique and original gardens are themed to entice and create new plant enthusiasts. Of course, experienced gardeners will also appreciate the exotic and tropical plants we use that thrive indoors in our terrarium environments.

Get used to exciting new products twice a year, exceptional customer service, and top-of-the-class quality. Experience the DuneCraft difference! We offer an array of services to our customers including private label, custom items, custom merchandising displays, signage, and much more.

Our products are proudly made in the USA and we unconditionally guarantee them. We safety test our items to the highest standards and quality test them extensively in-house. We offer EDI support, and will work with your system to meet your margin goals. We will do what it takes to ensure your complete satisfaction with the end result.

Please visit www.dunecraft.com, to see new items, our show schedule, recent articles and video clips, download high resolution images, play a venus fly trap game, download retail signage and tons more.
