# PARK IN A BOTTLE

## DuneCraft

## Growing and Care Instructions

Why go to the park to relax when we bring the park to you? Yes, you read correctly, grow lush grass and pine trees in our high-quality, custom-crafted glass terrarium! This kit of relaxation in a bottle comes with everything you need, just add water. It even comes with a little park bench to mentally park yourself at and complete the tantalizing scene of tranquility. All plants are quick to sprout and guaranteed to grow!

## Contents

- Glass Terrarium
- Japanese Red Pine *Pinus densiflora*, 100 mg
- Shady Spots Grass Mix, 35 mg
- Natural Stones
- Park Bench
- Germination Disk
- Care Instructions

## Planting Instructions

- Carefully unwrap your Glass Terrarium and place on a solid surface. Place the terrarium where it will receive natural sunlight or indirect light.
- Place your germination disk inside the Glass Terrarium and add one cup of water. The germination disk will absorb the water and expand into your growing medium.
- Break up cylinder of moist soil and smooth into bottom of bowl.
- Gently push down the growing medium so it sits firmly on base of the Glass Terrarium and does not extend out of the opening. The growing medium should be well moistened but there should not be any pockets of standing water.
- Plan your garden, sprinkle half the seeds onto your growing medium as desired. Gently push them into the medium. Cover the medium with sand and mist the top gently. The seeds will sprout in about one to two weeks. This kit comes with enough seeds for two plantings. Be sure to save half the seeds if you want another planting and store your saved seeds at room temperature in an area without too much humidity.

## Growing Tips

- Water as needed, the growing medium should be moist and have no pockets of standing water.
- You may need to add water 2 to 3 times per week depending on conditions.
- Allow your Glass Terrarium to receive sunlight or bright indirect light for several hours each day.

## Japanese Red Pine

Japanese pine is truly a unique and beautiful plant. The thick pine needles are marked with yellow and green and the peeling bark has a rich rustic orange color. Found across the world this tree is commonly used as a windbreak, its deep sturdy roots and full needles provide protection for other plants.

## Shady Spots Grass Mix

Every comfortable park has a place to sit in the shade, in your new Glass Terrarium Park in the Bottle we have selected a mix of shade loving species that will grow together into a beautiful array of flowers and plants. Care free and easy growers, you're sure to enjoy this hand selected mix.
