Wildflower Garden

DuneCraft

Growing and Care Instructions

Few things match the natural beauty of flora in their native environment. Our Wild Flower Glass Terrarium contains a hand picked mix of the most beautiful wild flowers many of which grow in open meadows and sunny pastures. DuneCraft's Mountain Meadow Glass Terrarium brings this serene setting into your home, office or any other location you may choose. Setting up and planting these flowers will make you feel like your in field of wildflowers or sunny pasture no matter where you may be!

Contents

- Glass Terrarium
- Meadow Mix, 200 mg
- Germination Disk
- Care Instructions

Planting Instructions

- Carefully unwrap your Glass Terrarium and place on a solid surface. Place the terrarium where it will receive natural sunlight or indirect light.
- Place your germination disk inside the Glass Terrarium and add one cup of water. The germination disk will absorb the water and expand into your growing medium.
- Break up cylinder of moist soil and smooth into bottom of bowl.
- Gently push down the growing medium so it sits firmly on base of the Glass Terrarium and does not extend out of the opening. The growing medium should be well moistened but there should not be any pockets of standing water.
- Plan your garden, sprinkle half the seeds onto your growing medium as desired. Gently push them into the medium. Cover the medium with sand and mist the top gently. The seeds will sprout in about one to two weeks. This kit comes with enough seeds for two plantings. Be sure to save half the seeds if you want another planting and store your saved seeds at room temperature in an area without too much humidity.

Growing Tips

- Water as needed, the growing medium should be moist and have no pockets of standing water.
- You may need to add water 2 to 3 times per week depending on conditions.
- Allow your Glass Terrarium to receive sunlight or bright indirect light for several hours each day.

Meadow Mix

For many of us, stepping into a field of wildflowers is one of the most beautiful experiences we encounter in nature. Wildflowers are all around us and they thrive in wetlands, meadows, roadsides, forests - almost anywhere you travel. There exists a deep-seated impulse we developed in childhood to reach out and pick a flower from a pristine butterfly-filled meadow.

Wildflowers are a means to attract wildlife such as birds or butterflies. Landscaping and gardening with wildflowers has countless benefits including creating a habitat for many different animals; from native pollinators to birds, to small mammals. When properly established, wildflowers may require little care and no fertilization or water. They almost become maintenance free.
